

(人類生態学特論 I)

**Lecture Schedule of Human Ecology I, 2007**  
**(for Graduate Course, School of International Health)**  
[title fixed 07.04.16]

Human Ecology is an understanding of human species in their various ecological settings, which are also being modified by human species. This course will be a series of lectures and discussions, in which we introduce and discuss basic ideas of Human Ecology, emphasizing its methodology and potential implications for International Health. Those who are interested in taking the course should attend the first class (May 11); but preferably, contact in advance either

Prof. Watanabe chiho@humeco.m.u-tokyo.ac.jp or,

Dr. Umezaki umezaki@humeco.m.u-tokyo.ac.jp

Credit will be given on the basis of a term paper (report), presence in the class, and active participation to the discussion.

**Date and time: Friday 9:30 -- 12:10 a.m.**

**Room:** Meeting Room of Department of Human Ecology  
**(E604, 6th floor at Annex of Med. No.3 building)**

**Lecture Schedule:**

May 11 Basics of Human Ecology (Watanabe)  
May 18 Food consumption, nutrition, and environment (Watanabe)  
May 25 Methodologies of data collection in the field (Umezaki)  
June 1 no class  
June 8 Long-term change of adaptation (Umezaki)  
June 15 Chemicals: is it good or bad for human survival? (Watanabe)  
June 22 Transition of Culture and Adaptation of the *Jino* in Yunnan, China ;  
1994-2007 (Dr. Taku ABE: Meiji University)
